

# Wireless Handwheel

Handwheels are devices used in machines for manual control of axes such as CNC machines. Wireless handwheel is a product that allows you to perform the full function of the handwheel without any cable. It is possible to control your machine from a maximum of 100m distance on the wireless handwheel with double emergency stop relay. It can be adapted to all CNC control panels with different mode options and can be used in all devices with encoder or MPG input.

## Wireless Handwheel Features

<b>Power Supply</b>	Transmitter: 2xAA Pil - Battery Receiver: 24-40 VDC
<b>ACS</b>	Two Relays (NC)
<b>Main Body Type</b>	ABS
<b>Protection Class</b>	IP65 (Transmitter)
<b>Weight</b>	Transmitter 500gr - Receiver 150gr
<b>Distance</b>	100m max.
<b>Power (max)</b>	Transmitter: 1W - Receiver: 0,2W
<b>Working Temperature</b>	-20 +70 °C
<b>Storage Temperature</b>	-30~80 °C
<b>Humidity Rate</b>	45~85 %RH
<b>Warranty</b>	2 Years
<b>Product Code</b>	Hec-O-A
